It's alright, but it's kind of pricy for the current state it is in. There are a lot of bugs, but at least the devs are listening. It is early access after all, so there will be improvements. I am finding it slightly confusing sometimes, can't seem to progress far without going bankrupt on the first day.. I was a bit skeptical when I heard the praise for this game. It seems rather peculiar that procedurally generated puzzles could be as expressive and focused as human-designed ones. But, the game does an excellent job of crafting and curating puzzles. The mechanics are few but very deep. Many puzzles initially present you with situations that seem to be very limited but after some experimentation you discover new avenues to explore. And the difficulty of the puzzles (and they are difficult) doesn't feel cheap like those in sudoku generators. The game never inundates the player with large numbers of platforms or generates overly complex shapes. Each puzzle's difficulty is the result of very few moving parts. Overall, the success of the game comes down to the approach the designer had in presenting the mechanics which feels like a Zachtronics game in a weird way. Rather than having puzzles be a vehicle for facts about the game's universe the puzzles are varied and unique enough that at a sufficient number of puzzles you will encounter plenty of golden nuggets. If you like puzzle games, this is one not to be missed!. like the game after couple of beers, but I have problem with blue colors..maybe I m colorblind or sth :)

enjoyable. good for cards. Absolutely the worst game ever. Controls and physics are♥♥♥♥♥♥ Total Rubbish. This didn't work on my upper end, windows 8.1 machine. Don't buy if you have windows 8. Looks like I only wasted \$4.00 this time.. This game is way better then expected. After playing the Demo i decided to buy it. It is worth it.I have the feeling this game is made by the same Farm Expert devs. It has pretty much everything like in FE 16 or FE 17 except the 3D textures on fields. it runs ok, The map is huge and with the addition of the expansion you have both EU and NA scenarios

I didn't experience any crashes or FPS drops. the only thing its a little dissapointing it is that the mirrors in cabin drive mode are not usable. All the rest is ok and looking pretty good actually with max graphics and "no blur". The machimes even get some dirt on them which you can wash at your home petrol stratiobn. It is not as extreme as in Farm Expert 17 but it is enough.

You can hire workers to do the jobs but you don't see them in the fields. The jobs are done once you assign them to the field and activity.

if you bought FE 17 and you hate it, buy this one, it will ease your hard feelings.  
Check out some youtube videos and you will see the difference

The gameplay goes like this:

- open interface M and select workers tab which is available only when you are in your farm (home)
- select an activity like Plow, Cultivate, Seed and Harvest and then select the field you want it to be done for.
- the activity will be done imediately, no tractors or workers on the actual field. So it will take from a few seconds to maybe half a minute depending on the size of the field and your computer speed. If it takes longer then a minute, the game is not

---

crashed but only calculates the things slower. Bare with it, it will be done eventually.

- The only activities workers DON'T DO are Fertilize and Baling the hay. You will need to do them personally on each field. This will take some time and the more fields you have the more time it will take. Fertilizing is pretty fast while Baling the hay is not. So you might want to skip this one even if selling all the bales will get you a LOT of money
- You can skip seasons from Early Spring to Late Spring to Early Summer to Late Summer to Early Autumn to Late Autumn/ This is the only way you can advance in time faster. Of course, you can wait for each day to pass by but i don't recommend it.
- After Harvest all you need to do is repeat the Plow, Cultivate, Seed and Fertilize steps in the Autumn season so you can have the crops almost ready in Spring season

That's it. have fun and become a great farmer.

Of course, if you want you can do all the activities - Plow, Cultivate, Seed, Fertilize, Harvest and Bale, and Sell - on your own. It will take you so much time that you will actually feel like you are spending a real time year in the game.. The devs have been working on this game its fun, it reminds me of the movie Krull.. It is a wonderful game, a great shame that it wasn't a success when it was new. I absolutely recommend it to anyone who enjoys classic adventure and mystery games, especially the fans of historical settings. And I have to say, re-released on the centenary of World War I, this game is current as ever.

There are a few minor caveats though, that I need to mention...

First, the control scheme is extremely unusual, and not very intuitive, especially if you are used to point-and-click games. It definitely takes getting used to, but once you get the hang of it, you won't even notice this.

Second, the Windows version at least seems to be somewhat buggy - I have ran into a few crashes, peculiar slowdowns and speedups, and action icons getting mixed up randomly (like "turn around" being shown instead of "go forward", or having an item icon stuck as your "interact" icon, even after you've disposed of the item...)

Third, there are a few genuine design glitches, especially surrounding the artifact missing from Tyler Whitney's compartment. It is nothing major, but it's definitely something that the creators, or the remastering team could really have tackled better.

gooooooooooooooooood game

play it like a BOSS !!. I would recommend.yes it is not free.but it offers you a more safe game from regular(mm) servers.there are very enjoyable matches at high ranks.. this game sucks there is no manual and I was unable to even get something from the inventory. Perfect game to play with friends and family. asset flipper
