Moreover, the difference in BPI-5 scores between WPSO and WC-OS appears to be largely driven by patients who initially experience moderate-to-severe pain in the WC-OS. Irrespective of the lack of external validity of the model, our results might be useful to improve patients' outcome by better defining current PWPSO. In particular, the score of the BPI-5 could be used as an indicator to define the severity of PWPSO, and to prescribe further, more comprehensive treatments. This study has several limitations. First, its design is based on a convenience sample of eight selected general practices in Tuscany, and, 1cdb36666d
